DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11 are allowed.

2. The following is an examiner's statement of reasons for allowance: with respect to claims 1 & 9, in addition to other limitations in the claims, the prior art of record fails to teach, disclose or render obvious the applicant's invention as claimed, particularly the feature describing an output MUX converts the binary data into an output signal having one of a least four levels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 4. Oprescu et al (6,639,423) discloses a bi-directional bus transceiver having multiplexers, transmitter, receiver, and encoding circuit, but the multiplexer does not converts the binary data into an output signal having one of a least four levels.
- 5. Martin et al (6,507,225) discloses a bi-directional bus transceiver having multiplexers, transmitter and receiver, but the multiplexer does not converts the binary data into an output signal having one of a least four levels and no encoding circuit.
